

Aerosol Room Deodorant

#106630

#106631

#106632

The special propellant system and unique valve used allows this deodorant to be propelled as a dry mist. The tiny particles of the mist hang in the air for longer than is possible with the heavier droplets of ordinary sprays.

Use whenever and wherever fast, on-the-spot deodorizing is needed. Our formula removes odors from restrooms, kitchens, sickrooms (even those used for cancer and burn patients), nurseries, fire scenes, pet quarter and many others.

Nobody Solves Tough Cleaning Challenges Better.
